

Product features

This tripod is extendable, with a height adjustment range of 1.2 to 2 meters. The main body is made of epoxy glass fiber and stainless steel materials. The antenna can be directly installed on the 3/8" male thread at the top of the tripod, or installed and set up using an antenna adapter. It is mainly used for laboratory testing.

Main specifications

Parameters	Min	Max	Units
Lifting height	1.2	2	m
Folding height	1.2		m
Bearing		12	Kg

Other parameters

Connector	3/8" Male Thread
Outline size	1600*1600*2000mm
Estimated weight	7Kg
Operation Temp.	-45~+55°C Design assurance
Other	Tripod foldable, equipped with pitch adjustment mechanism
