

Product features

Spot supply, clearly priced.

Adopting MM structure, the product has small parasitic parameters and a frequency of up to 100GHz.

Surface pure gold electrode, suitable for micro assembly processes such as gold wire and gold ribbon.

Suitable for Au/Sn, Au/Si, Au/Ge eutectic soldering, as well as Sn/Pb and conductive adhesive bonding.

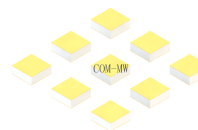

Main specifications

Parameters	Min	Typical	Max	Units
Capacitance value		100		PF
Capacitance error		±20%		
Withstand voltage		100		V
Operation Temp.	-55	~	+125	°C
IL		0.25		dB@18GHz
IL		0.5		dB@40GHz

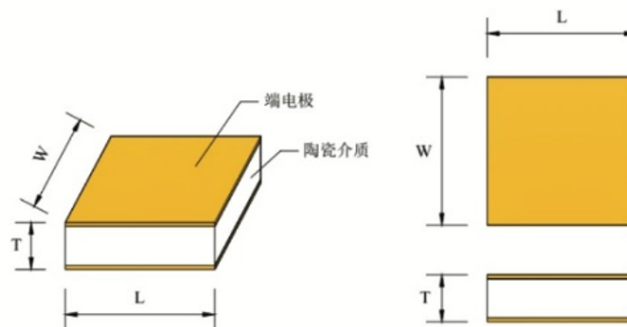

Other parameters

Quality Grade	Industrial grade
ROHS	Compliant Available
Other	Ceramic materials
