

Product features

It has characteristics such as medium gain, wide operating frequency band, and good performance consistency within the operating frequency band.

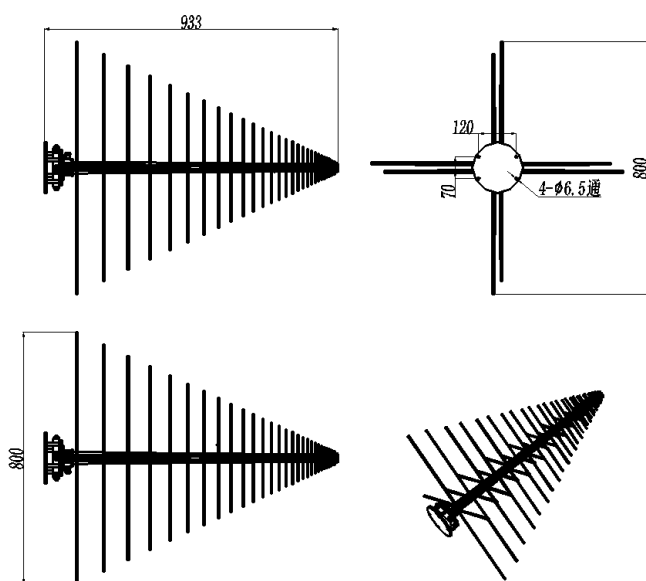

Main specifications

Parameters	Min	Typical	Max	Units
Frequency	200	~	500	MHz
Gain		5		dBi
VSWR		2		
Isolation		15		dB

Other parameters

Polarization	Dual Circular Polarization
Power Capacity	20W Design assurance
Connector	N-K
Outline size	810*810*940mm
Estimated weight	3.2Kg
Surface	Grey
Operation Temp.	-25~+55°C Design assurance
Storage Temp.	-45~+75°C Design assurance

Configuration(mm)

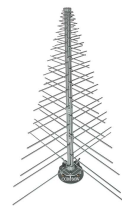

Note

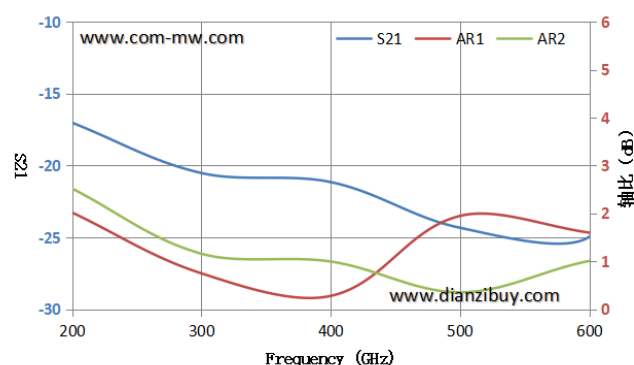

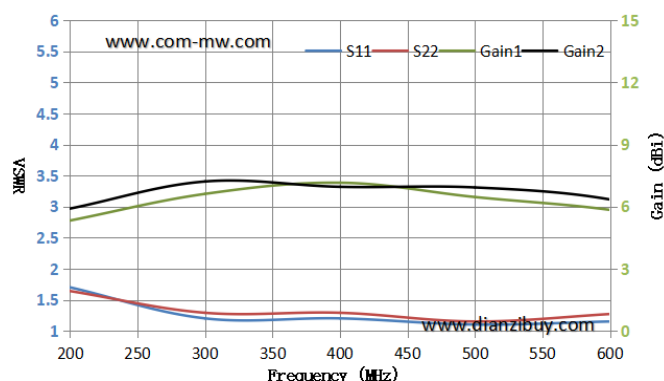

1. Non professionals are not allowed to disassemble.
