

Product features

The characteristics are simple structure, high gain, and strong directionality. Customizable single line polarization, dual line polarization, and dual circular polarization antennas.

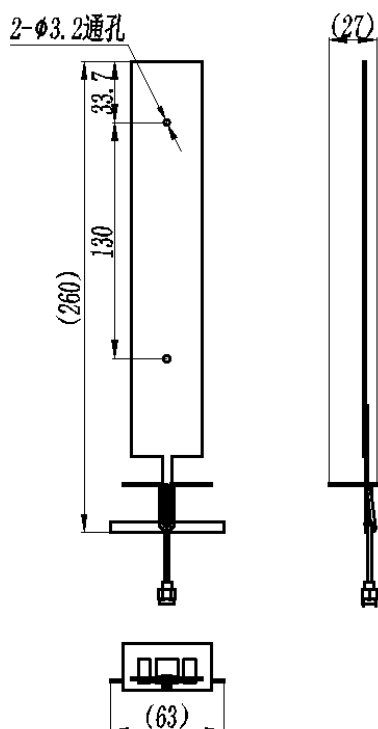

Main specifications

Parameters	Min	Typical	Max	Units
Frequency	2.4	~	2.5	GHz
Gain		11		dBi
VSWR		1.6		

Other parameters

Polarization	Linear Pol.
Power Capacity	10W Design assurance
Connector	SMA-J
Outline size	260*63*27mm
Estimated weight	100g
Operation Temp.	-25~+55°C Design assurance
Storage Temp.	-45~+75°C Design assurance

Configuration(mm)

Note: The specifications and performance data contained in this data sheet are based on tests established by CMW.
