

Product features

The Microstrip antenna has the characteristics of light weight, small size, etc. It can achieve a higher gain microstrip array antenna through multi element array.

Reference picture

Main specifications

Parameters	Min	Typical	Max	Units
Frequency	32	~	38	GHz
Gain	5			dBi
VSWR			2	
3dB Beamwidth	60			°

Other parameters

Polarization	Right-handed circular polarization
Connector	2.92-K
Power Capacity	2W Design assurance
Outline size	35*35*12mm
Estimated weight	30g
Surface	Color conductive oxidation
Operation Temp.	-25~+45°C Design assurance

Configuration(mm)

Note

Avoid collisions during installation.

It is strictly prohibited to disassemble antenna accessories, as it may cause poor antenna performance.

The installation position of the antenna should be free of any obstacles.

Outdoor use should be equipped with lightning protection facilities.

May contain electronic components, please do not dispose of them randomly.
