

Product features

It has characteristics such as medium gain, wide operating frequency band, and good performance consistency within the operating frequency band.

Main specifications

Parameters	Min	Typical	Max	Units
Frequency	2	~	18	GHz
Gain (within beam)		5		dBi
VSWR		2.5		
Beam width		90°*50		°
power		25		W (Design assurance)

Reference picture

Other parameters

Polarization	Linear Pol.
Connector	SMA-K
Outline size	150*105*30mm
Estimated weight	150g
Surface	Grey
Operation Temp.	-25~+55°C Design assurance
Storage Temp.	-30~+60°C Design assurance

Configuration(mm)

Note

1. Non professionals are not allowed to disassemble.
